

GUIDELINES FOR LANDINGS DOCK FLAG DISPLAY

The only flag to be displayed is a USA flag no larger than 3'X5'. The flag must be displayed on a commercial made telescopic flagpole and mounted on the hoist, not the dock. The flagpole must have a solar light to allow the flag to be flown 24/7. The telescopic pole allows all flags to be flown at the same approximate height to assure uniformity of all flags. Hoist height depends on the size and configuration of the hoist. The tallest hoist will restrict the height of the flag to approximately 6 feet above the top hoist cover. Smaller hoists will have to raise the flag height to meet uniformity with the largest hoist flag. The flagpole must be removed before October 15 so not to interfere with the removal of hoists.

If an owner is wishing to display a USA flag, they need to contact the Marina Committee before purchasing the flagpole, so all guidelines are being met. The Marina Committee and the Landings Board of Directors has the option to limit the number of flags being installed.

Respectfully,

2020 Marina Committee Members
