ABERDEEN POA ARCHITECTURAL APPLICATION AND STANDARDS-2025

The ARB procedure is as follows:

1. All applications must be signed and approved by your Village prior to submission to the POA or the package will be returned to the homeowner.

FILING ELECTRONICALLY IS THE PREFERRED METHOD. ONLY ONE (1) COMPLETED COPY IS REQUIRED.

2. The following materials **MUST** be included with your request:
 - a. copies of proposed architectural improvement/replacement application.
 - b. copies of your property survey marking dimensions and location of your improvement.
 - c. copies of contractors Certificates of Insurance for Liability and Workers' Compensation Coverages, Contractors Occupation License.
 - d. copies of NOA's (Notice of Acceptance) if applicable.
 - e. copies of the signed contract.
 - f. Neighbor's signatures (each side). This is a courtesy notification for your neighbor. If the neighbor is unavailable, so state with explanation. (i.e., snowbird, away. If the neighbor refuses enter "refused".)
3. If required by the guidelines, your Village Architectural Review Committee (ARC) will forward your request to the Architectural Review Board (ARB) of the Aberdeen Property Owners Association for approval.
4. After processing, the application is forwarded to the POA Property Management Company for distribution:
 - a. An electronic copy is retained in the POA files.
 - b. An electronic copy is forwarded to the Village Property Manager for the village files.
 - c. An electronic copy is forwarded to the Village ARC.
 - d. An electronic copy is forwarded to the Property Owner.

If approved, the following conditions are part of the ARB approval

1. If the architectural modification is not completed as approved, the approval may be revoked, and the modification may be required by the POA to be removed by the owner at the owner's expense.
2. The unit owner is responsible to pay for the repair of any and all damage done to the common areas as a result of the work related to the architectural modification.
3. The architectural modification will comply with the State, County or City Building Codes and all necessary applications and permits will be obtained by the owner. Notice of Acceptance from Palm Beach County and Miami-Dade County Hurricane Code is required for hurricane resistance modifications.
4. If the application is denied by the Village ARC or POA ARB Committee, the owner can appeal to the Aberdeen POA Advisory Board.
5. If the modification is not approved and the unit owner proceeds with the work, the unit owner may be subject to court action by the Association and shall be responsible for all reasonable attorneys' fees.

GUIDELINES FOR SUBMITTING AND REVIEWING ARB REQUEST-2025

1. Every Aberdeen resident who desires to modify or refurbish the exterior of his unit and/or the grounds immediately surrounding the unit must complete an ARB Request on the appropriate form supplied to each Homeowners Association by the POA Property Manager, Campbell Property Management. (561) 432-2703.
2. The ARB Request is submitted to and reviewed by each respective Homeowners Association, Architectural Review Committee designated by the President of the Homeowners Association Board of Directors. Certain ARB requests, listed below, can be approved solely by the ARC. All others are forwarded to the POA Architectural Review Board for final determination, regardless of the action taken by the local ARC. ARB Requests that fall under the jurisdiction of the local ARC's include:
 - a. Landscaping of individual residential units and community common areas
 - b. Residential unit house numbers
 - c. Mailboxes
 - d. Residential unit outer doors, storm/screen doors, front door and screened entrance enclosures
 - e. Placement of satellite dishes not to exceed one meter in diameter, including screening and landscaping treatment
 - f. Color of paint for residential units, outbuildings, recreational facilities, and trash can enclosures
 - g. Driveway surfacing treatments
 - h. Addition of gutters and leaders
3. The POA-ARB may approve, disapprove or **return** the ARB Request to the local ARC for further consideration, **additional information** or clarification. The Applicant and the concerned Homeowner's Association are formally notified of the results of the POA-ARB reviewed by Campbell Property Management.
4. In almost all instances, the POA-ARB will accept the decision of the local ARC. In rare cases, after a thorough investigation, the POA-ARB may override the ARC decision due to extraordinary circumstances as determined by the POA-ARB. Homeowners may appeal the decision of the POA-ARB by contacting the President of the POA in writing and requesting an appearance before the POA Advisory Board to present their arguments. The decision of the POA Advisory Board is final.
5. In reviewing the ARB requests, the POA-ARB requires the following information:
 - a. The name of the applicant's community
 - b. Signature of applicant submitting the request
 - c. Action and sign off by local ARC
 - d. Acknowledgement of neighbors residing on each side of the applicant
 - e. A site plan of the applicant's property indicating the residence, lot lines and outlining the area of work. Some older East residences may not have a Developer-supplied site plan. They should furnish a sketch showing the required information.
 - f. A complete description and sketch clearly indicating the work to be done
 - g. Data showing the product meets or exceeds Miami Dade and Palm Beach County Hurricane Code

Requirements. This is known as Notice of Acceptance (NOA)-it applies to hurricane related modifications, i.e., hurricane shutters, hurricane windows and glass enclosures.

- h. Outside Contractors license and Certificates of Insurance. Homeowners who elect to obtain ARB request approval before selecting a Contractor should check for Liability and Workers' Compensation insurance coverage before permitting work to begin.
- i. Permanent generator installation-refer to item number ten (10).
- j. Copy of Contract-Project pricing is not required.

6. The Homeowner is responsible for obtaining all the necessary permits, approvals and compliance with all applicable codes, rules and regulations.

7. Requests for installation of solar panels for supplementary heating will be automatically approved since they are considered energy conservation devices. Also, requests for a satellite dish will be automatically approved as directed by current Government regulations. However, a completed ARB package is required for review

8. ARB Requests for hurricane shutters of either the accordion type or removable panel type will be approved. Accordion type hurricane shutters and panel type shutters may **ONLY** be closed and panel type shutters installed when a hurricane (or other severe weather) becomes a named storm by the National Weather Service. Accordion type shutters must be opened and panel type shutters must be removed within five (5) days or the following weekend, whichever is longer after passage of a hurricane or hurricane watch. The POA will permit permanent window treatments in areas of limited accessibility of a polycarbonate material that is clear and flat (not corrugated) that meets Miami-Dade hurricane shutters standards and is contoured to fit the window, (Also known as Lexan shutters), or hurricane screens as long as they meet the Miami-Dade standards.

9. All Aberdeen homeowners who desire to install a new or replace an existing screen enclosure must submit an ARB request form to the ARC. The ARC will approve or disapprove then forward it to the POA Architectural Review Board. The request must include drawings and specifications which meet the requirements of the Palm Beach County Building Department. County requirements are intended to produce a hurricane resistant structure. A Palm Beach County Building Permit is necessary for this project. Final inspection by an Inspector of the County Building Department is an assurance that construction complies with the engineer design and specification.

10. Permanent Generator Installation-Aberdeen homeowners who desire to install a permanent emergency electrical power generator must submit a request for approval to the POA Architectural Review Board (ARB). The submittal must include a survey which must have flood zone information on it. The installation drawings shall also show locations of all windows and doors near the generator exhaust. The generator exhaust shall be at least 10 feet (10) away from operable windows and doors, including those in neighboring houses, but excluding garage windows and doors. The generator exhaust may not discharge on to adjacent property. The generator must use propane fuel (not gasoline), be completely enclosed in a weather resistant housing, mounted outdoors on a concrete slab, and securely fastened to resist hurricane force winds. The enclosure must be located so that it will result in minimum disturbance to adjacent neighbors and must be screened by appropriate shrubbery so that the enclosure is not visible from the street or adjacent neighbor's residences. The propane storage tank must be located outdoors, buried, and include provision for periodic monitoring to insure against leakage that could possibly contaminate the surrounding soil and groundwater, which at Aberdeen is close to the surface. Also, the buried tank must be securely anchored to prevent it from "popping" out of the ground in the event of a prolonged rainfall which may temporarily raise the groundwater level. The permanent generator installation must comply with all applicable requirements of the Palm Beach County Guidelines and Florida Building Code. The homeowner is responsible for obtaining all necessary permits and inspections required by the

County. The generator, fuel tank installation and electrical interconnections must be completed by an insured and licensed contractor. Noise produced by the generator must not exceed current Palm Beach County and State of Florida requirements.

11. Any exterior add-on appurtenance, which in the opinion of the POA-ARB has potential of becoming a missile in the event of a hurricane will not be approved.
